

## Master page: Public content section

Last Modified on Oct 13, 2022

In the Public content section, you can define information that will help your Customers understand what your Master page is for. You can include basic information about yourself, your organization, your meeting type, location or your staff member and write a welcome message to the Customers who schedule time with you.

The Public content is used when your page is in **Enabled** status as well as in **Disabled** status. When you [disable your Master page](#), you can keep the Public content section as is, or change it to display a different message.

### Location of the Public content section

You can access this section by going to **Booking pages** on the left and select the relevant Master page → **Public content** (Figure 1).

**Note:**

Do not create a line break after `<a` at the start of the code. In the above graphic, it wraps to the next line automatically due to spacing. However, your entry should not have any extra line breaks.
