

Applying a theme

Last Modified on Oct 10, 2021

The ScheduleOnce [Theme designer](#) allows you to fully customize the look and feel of your [Booking pages](#) and [Master pages](#).

Themes are applied to each Booking page and Master page individually. However, applying a theme to a Master page always overrides the themes applied to the Booking pages [included in that Master page](#).

Themes determine the logo, branding, and look and feel of your Booking pages and Master pages. Any changes made to a theme that has already been applied to a page are immediately visible on the Customer app.

Applying a theme

You can apply a theme in a couple places: on the relevant page at **Setup -> ScheduleOnce setup** or on the relevant theme in the [Theme designer](#).

Apply a theme directly to a page

1. Go to **Setup -> ScheduleOnce setup** in the top navigation bar.
2. Select the [Booking page](#) or [Master page](#) for which you want to change the theme.
3. In the **Overview** section, select a theme from the **Theme** drop-down menu (Figure 1).

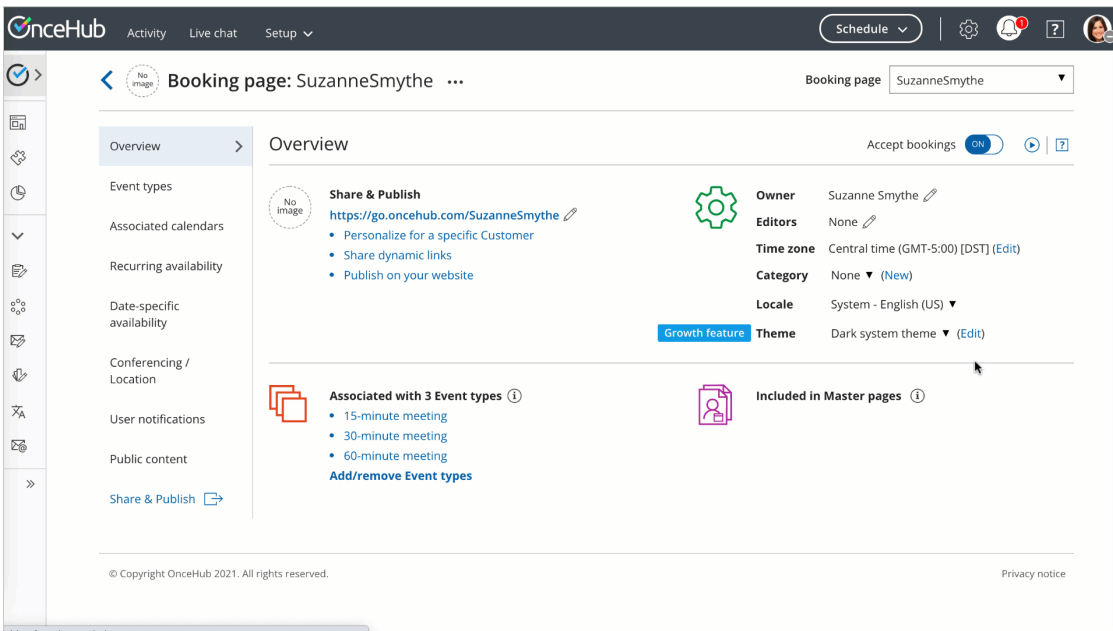

Figure 1: Apply a theme directly to a page

Apply on a specific theme

1. Go to **Setup -> ScheduleOnce setup** in the top navigation bar.
2. In the lefthand navigation menu, select **Theme designer**.

3. Select the theme you want to apply.
4. In the three-dot menu, click on **Apply** (Figure 2).
5. Select the relevant page(s) you want to use that theme and select the **Apply** button.

Your default theme

In the [Theme designer](#), you can set a default theme that applies to any newly created Booking page or Master page.
