

System themes

Last Modified on Jun 5, 2023

The OnceHub Theme designer provides two system themes for your Booking pages and Master pages. You can use these themes as they are, or adjust them according to your needs.

In this article, you'll learn about System themes.

Editing a system theme

- 1. Go to **Setup -> OnceHub setup** and open the lefthand sidebar.
- 2. In the **Tools** section, select **Theme designer**.
- 3. Select a System theme from the list on the left hand side of the page (Figure 1).

- 4. If required, you can add a **header logo**, edit the **button color**, and edit the **button font color**.
- 5. When you're done making changes, click Save.

Theme properties of a System theme

You can customize the following Theme properties of a System theme:

- Header logo: This image is visible to your Customers.
- Button color: This is the color of the buttons and other properties on your page. It is intended to attract your Customer's attention to specific elements.
- Button font color: This can be used to maximize contrast against the button background color. We recommend keeping it on Automatic.

If you want to customize additional Theme properties, you'll need to create a Custom theme.

You may need to upgrade your plan to apply a custom theme to your page(s).

Previewing and applying a System theme

To preview a theme on a Booking page or Master page, select it from the drop-down menu in the top right of the Theme designer and click the **Preview** button (Figure 2). Previewing a theme does not apply the theme to the page.

Default theme

You can set any theme as your default theme, including a system theme. The default theme is automatically applied to all newly created pages, but not to existing pages.
