

Resource pool statistics: Bookings received

Last Modified on Oct 12, 2022

[Resource pools](#) allow you to dynamically distribute bookings among a group of Team members in the same department, location, or with any other shared characteristic.

Bookings received is a metric provided for each Booking page you've included in a [Resource pool](#). **Bookings received** is the number of bookings that a specific [Booking page](#) has received to date, within the [Reporting cycle](#).

In this article, you'll learn about viewing and understanding the Bookings received metric.

In this article:

- [Viewing the Bookings received metric](#)
- [Understanding the Bookings received metric](#)

Requirements

To view the **Bookings received** metric, you must be a [OnceHub Administrator](#).

Viewing the Bookings received metric

1. Go to **Booking pages** in the bar on the left.
2. Select **Resource pools** on the left (Figure 1).

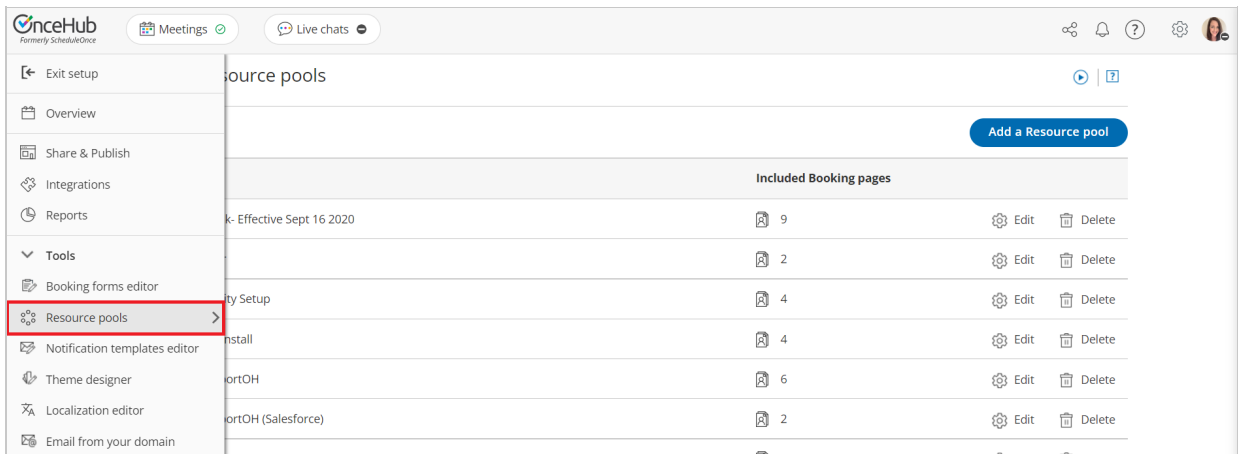

Figure 2: Resource pools

3. Select the specific Resource pool you would like to view **Bookings received** for.
4. Go to the **Resources** section of the Resource pool (Figure 2).

The screenshot shows the 'Resource pool: Product Team' interface. It includes a navigation menu with 'Overview' and 'Resources'. The 'Resources' section displays a table with the following data:

Booking page	Date joined	Participating ⓘ	Bookings received ⓘ	Bookings removed ⓘ	
Harry Bright	Jun 13, 2019	Yes	13	2	Remove
John Smith	Jun 13, 2019	Yes	10	1	Remove
Laura Jones	Jun 13, 2019	Yes	9	0	Remove

The 'Bookings received' column is highlighted with a red box in the original image. Additional UI elements include 'Add Booking pages', 'Automatic correction' (ON), and 'Average bookings per Booking page: 10'.

Understanding the Bookings received metric

If the specific [Resource pool](#) is included in multiple [Master pages](#), the **Bookings received** metric for each Booking page is the total number of bookings received by that Booking page across all Master pages.

Bookings can be received via direct scheduling, rescheduling, or reassignment.

- **Bookings received via direct scheduling:** This happens when a Customer schedules on a Master page that includes the specific Resource pool, and the booking is assigned to the specific Booking page.
- **Bookings received via rescheduling:** This happens when a Customer reschedules a booking and the booking is assigned to a different Booking page from the original Booking page that was assigned. In this case, the **Bookings received** counter will go up by one for the new Booking page that the Customer rescheduled with. The **Bookings removed** counter will go up by one for the original Booking page that the booking was rescheduled from.
- **Bookings received via reassignment:** This happens when a User reassigns a booking from one Booking page to another. In this case, the **Bookings received** counter will go up by one for the new Booking page the User reassigned the booking to. The **Bookings removed** counter will go up by one for the original Booking page that the booking was reassigned from.
