

What's new in version 8.5?

Last Modified on Jan 13, 2021

ScheduleOnce 8.5 introduces several major new features that help you integrate ScheduleOnce with your application environment and brand. Additionally, 8.5 includes tools to help you use ScheduleOnce in a GDPR-compliant manner.

Native Zoom integration

You can now seamlessly connect ScheduleOnce to the most popular video conferencing system. Our integration will ensure that Zoom is an integral part of all phases of the booking lifecycle. You can use Zoom with all meeting types. When a Customer makes a booking with you, a Zoom session is automatically created. Zoom meeting details will be included in all ScheduleOnce notifications and in the calendar event, ensuring you and your Customers have easy access to all meeting details. [Learn more about Zoom integration](#)

Editable Customer interface text

You can now edit every line of text on your Booking pages. You can edit the text to ensure your pages use the right terminology and your organization's tone of voice. Text can be edited in our new localization editor. Using the editor, you can create locales that can be applied to your Booking pages and Master pages. ScheduleOnce provides system locales in American English, British English, French, German, Spanish, Brazilian Portuguese, and Dutch. You can use these locales as is, or edit them with your own custom text. [Learn more about Editable customer interface text](#)

Webhooks

We have released our Webhooks API, allowing you to build custom integrations with third-party applications. Our API can be used to send booking data to your own web applications, services, or data warehouses. Developers or technically savvy users with scripting or programming knowledge can learn more about our API in our new [Developer center](#).

GDPR compliance

The General Data Protection Regulation (GDPR) is coming into effect in just two months. ScheduleOnce is ready for the new regulation and is here to help you with compliance. We have added new account settings and released a GDPR center on our website. If your organization is regulated by the GDPR, you should record details about your use of ScheduleOnce in the account settings. You can also visit our GDPR center for information and resources to help you ensure compliance. To learn more about GDPR compliance read our [practical guide to using ScheduleOnce in a GDPR-compliant manner](#) and [visit our Trust Center](#).
