

What's new in version 8.4?

Last Modified on Jan 13, 2021

ScheduleOnce 8.4 introduces new enhancements to the ScheduleOnce platform.

Manage Zaps from within ScheduleOnce

Using our Zapier integration, you can now manage your ScheduleOnce Zaps directly from within your ScheduleOnce account. You will be able to see a list of your ScheduleOnce Zaps and their statuses. With just a few clicks you can edit, turn on, or turn off any of your ScheduleOnce Zaps without leaving the ScheduleOnce platform.

Notification center

ScheduleOnce has created a Notification center that can be accessed in the top menu of your account. In the Notification center, you will receive notifications regarding third party connection errors and when your SMS credit balance is low or depleted.

Data Processing Addendum

ScheduleOnce is preparing for the General Data Protection Regulation (GDPR) taking effect on May 25, 2018. We have now published our Data Processing Addendum (DPA) on our website and edited our Master Service Agreement (MSA) to incorporate the terms of our DPA. [Read our DPA here](#)
