

What's new in version 7.1?

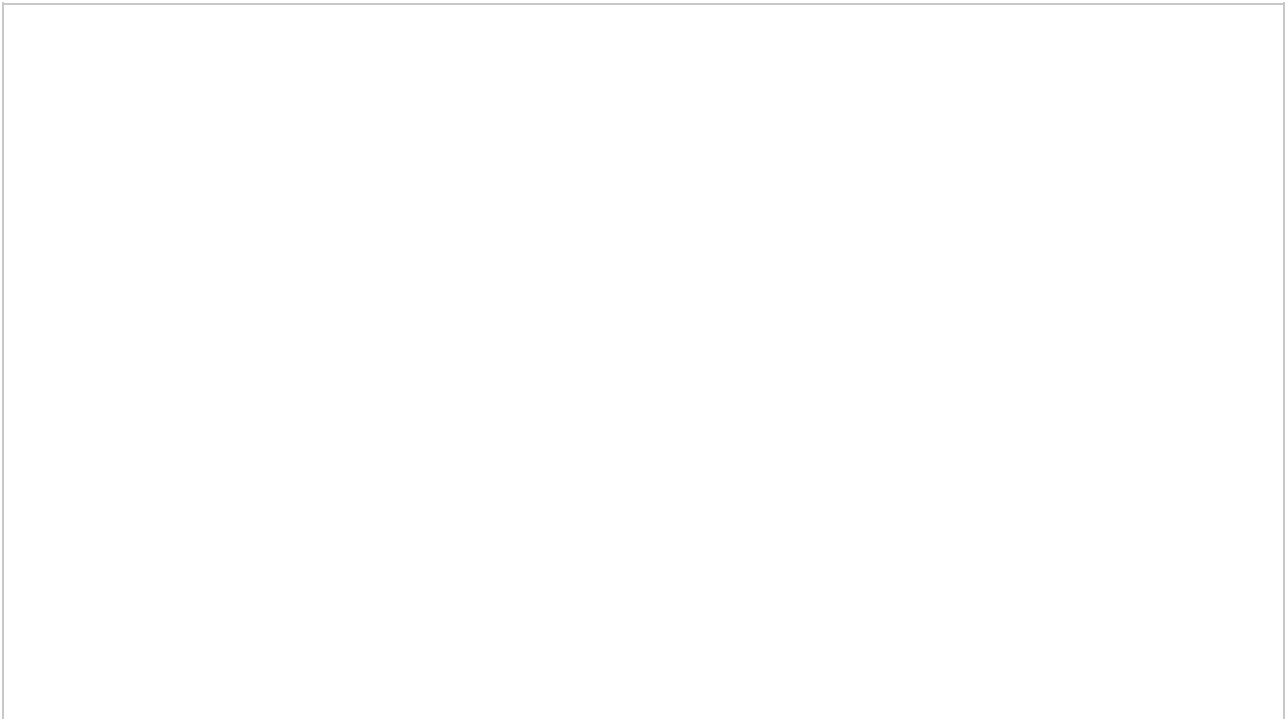

Last Modified on May 8, 2020

ScheduleOnce 7.1 adds rich integration with [Zapier](#), an integration platform that enables quick and easy data transfer between applications.

By integrating with Zapier, ScheduleOnce can instantly connect with hundreds of apps in multiple categories, including CRM, invoicing, productivity, email marketing, and more.

When a booking is made, more than 50 ScheduleOnce field types can be used to automatically create records in your favorite apps.
