VIDEO: The Localization editor

Last Modified on May 8, 2020

ScheduleOnce allows you to localize the customer scheduling experience by applying different languages and date and time formats to your booking pages and master pages. We offer seven languages out-of-the-box including American English, British English, French, German, Spanish, Brazilian Portuguese, and Dutch. You can use these languages as is, or edit them with your own custom text and date and time format.
