Notifications troubleshooting: A User is not receiving email notifications

Last Modified on Jun 2, 2023

There can be a number of reasons why a User is not receiving Email notifications. This article is relevant to Users who have never received User email notifications and to Users who were receiving them but are not anymore.

i Note:

If you use Email from your own domain, please see the troubleshooting Email from your domain article.

In this article:

- Check your junk mail folder
- Check your User notification Settings
- Verify that you are sending User email notifications to the correct email address
- Test your email address

Check your junk mail folder

We recommend that you check your junk mail to see if the notifications are there. Whether or not an email lands in junk mail depends on your own email client's filter. If you find it there, you can tell your email client that this notification is not spam.

Check your User notification Settings

In order to receive notifications about bookings made on a specific Booking page, the User must be either the Owner or an Editor of the Booking page. Learn more about adding Editors to a Booking page

- 1. Hover over the lefthand menu and go to the Booking pages icon → Booking pages → your Booking page → User notifications.
- 2. Ensure that email notifications are enabled for the Notification scenarios each User should receive email notifications for (Figure 1).

Overview	User notifications							
Event types	The account has 25 SMS credits. Buy more credits							
Associated calendars	Associated calendars Booking owner Sarah Jones							
Recurring availability Date-specific availability	Notification scenario	Email SMS	Email SMS	privileges will be added to this table.				
	✓ Automatic booking			privileges				
Location settings	Booking made by Customer (i)							
User notifications	Default 🔻

Verify that you are sending User email notifications to the correct email address

Ensure that the email address you are checking for notifications matches the email address used as your sign-in ID.

- 1. Select your profile picture or initials in the top right-hand corner \rightarrow Profile settings \rightarrow **Email notifications**.
- If the email in the Emails sent to field is not the email address you want to use, click Change your email ID (Figure 2).

<≡ ☆ Start	< Js Profile:	John Smith …	User	John Smith	~
유 Users 옷 Profile: John Smith ^	Email notifications Email notifications to John				?
Personal details Calendar connection	Emails sent from	OnceHub Mailer <mailer@oncehub.com> (Change for the entire account) OnceHub Mailer <mailer@oncehub.com></mailer@oncehub.com></mailer@oncehub.com>			
Email notifications	Emails sent to	johnsmith@example.com (Change your email ID)			
Date and time		Keep me up to date with news and product announcements

Test your email address

If the sign-in ID/Receiving email address matches the email address you've been checking, you can test the system using a different email address:

- 1. Change the email address in the **Emails sent to** field to a different email address temporarily. We recommend using an email address with a different domain than the one you were previously using.
- 2. Go to the relevant Booking page Overview section.
- 3. In the Share & Publish section, use the Public link to make a test booking.
- 4. Check the Inbox of the temporary email address and see if you received a confirmation email.

If you received a confirmation email to the temporary email address but not the original, it's possible that your email was placed on a suppression list by Amazon SES, our email service provider. This is usually because interaction with your email resulted in a hard bounce for an Amazon SES customer in the recent past. OnceHub can request for your email address to be removed from the Amazon SES suppression list. Please contact us to request this.

If you did not receive email to the new email address as well as the original email address, please contact us.
