

Add a ScheduleOnce button to Wordpress

Last Modified on Jul 16, 2020

Adding a Website button to your Wordpress blog allows your Customers to schedule an appointment with you without leaving your blog.

In this article, you'll learn how to add a Website button to your [Wordpress.org](https://www.wordpress.org) site.

Adding a ScheduleOnce button to Wordpress

Note:

Some WordPress themes do not support Javascript and therefore cannot support our website integration, which requires Javascript. This is true of all Wordpress.com sites.

Other WordPress themes, depending on how the theme was coded by the individual theme creator, might encounter other issues with the website integration. However, the vast majority work smoothly if the above guidelines are followed.

1. In the top navigation menu, click on the **Schedule button** and select **Publish on your website**.
2. Select the **Website button** tab (Figure 1).

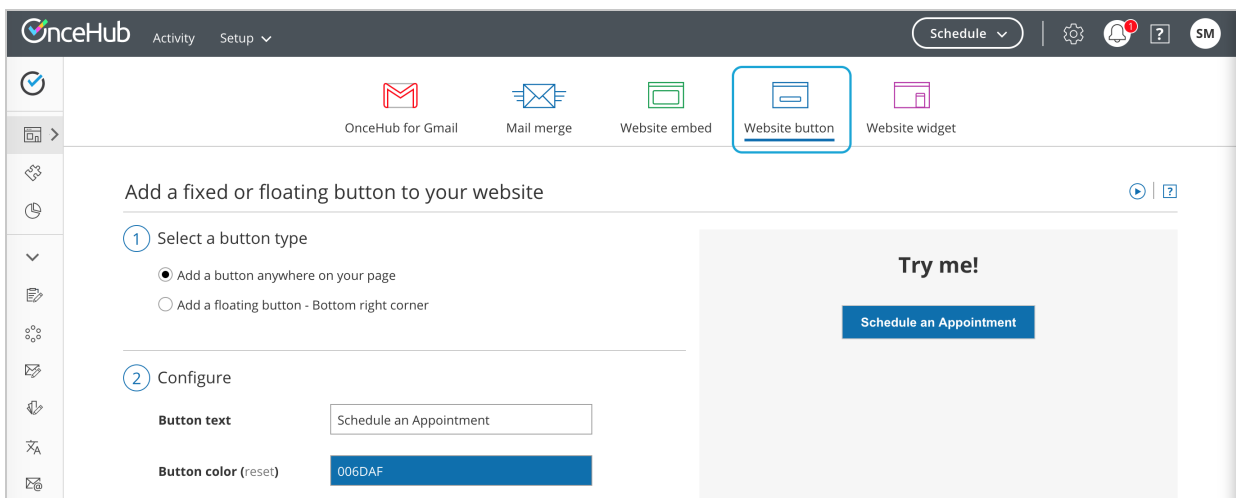

Figure 1: Website button tab

3. In the **Select a button type** step, select whether you want to **Add a button anywhere on your page** or **Add a floating button**.
4. In the **Configure** step, you can edit the **Button text** and select the **Button color**.
5. In the **Select a Booking page** step, select the [Booking page](#) or [Master page](#) you want to create the website button for.
6. In the **Customer data** step, select to have Customers fill out the Booking form, or select a [Web form integration](#) option.
7. From the **Button code** step, choose the **Display type**.
8. Click the **Copy** button to copy the code to your clipboard.

9. Next, go to your [Wordpress Administration page](#).
 10. In the left sidebar, select **Appearance**.
 11. Select **Widgets**.
 12. Select the **Custom HTML** widget.
 13. Next, choose whether you want to add it to your **Blog Sidebar** or **Footer**.
 14. Click **Add Widget**.
 15. In the **Custom HTML** pop-up, paste the button code from ScheduleOnce.
 16. Click **Done**.
 17. Test the button on your blog and make any adjustments.
