

How to disable your browser's pop-up blocker

Last Modified on Jul 26, 2019

When [connecting to your Google Calendar account](#), you might see an alert about the browser's pop-up blocker blocking the Google Calendar connection window. The message might say: *"The window was unable to open, and may have been blocked by a pop-up blocker. Please add this to the list of the sites your pop-up blocker allows to open"*.

There are two possible ways in which this can be fixed:

1. Create an exception for <https://app.oncehub.com/>. This will whitelist ScheduleOnce with your browser and pop-ups from ScheduleOnce will not be blocked.
2. You can disable the pop-up blocker entirely.

The following links provide step-by-step instructions for each browser type:

- [Google Chrome](#)
- [Mozilla Firefox](#)
- [Safari](#)

 **Note:**

Microsoft Internet Explorer is not a supported browser type.
