

# Multiple Team members accepting appointments with Event types using team or panel pages

Last Modified on Feb 3, 2021

You can use ScheduleOnce to accept bookings for multiple Team members with [multiple Event types](#). Team members can be accessed via one [Master page](#), or independently through their individual Booking pages. [Learn more about User management](#)

Bookings made on a Master page can be either automatically assigned to Team members according to rules you define, or assigned based on the Customer's selection. In this article, we will talk about [team and panel pages](#).

## Requirements

You must be a [OnceHub Administrator](#) to set up this scenario.

## How to set up

1. [Create the Event types](#) you require. If you want to work in [Automatic booking mode](#), make sure to select it in the Scheduling options section of each Event type. You can also work in [Booking with approval mode](#).

### **Note::**

If you want to automatically assign bookings, you must use Automatic booking mode.

2. Click on your profile image or initials in the top right corner and select **Users**.
3. [Create a User account](#) for each Team member.
4. You can [create a Booking page](#) for each Team member and [make the Team member the Owner of the page](#). Alternatively, you can leave it to the Team members to create their own Booking pages.
5. Once you're done with the settings, [create a Master page](#). Select [Team or panel page](#) in the **New Master page** pop-up (Figure 1).

6. Click **Save & Edit**.
7. You'll be redirected to the Master page [Overview](#) section. This section gives you a summary of your Master page's main properties. Here you can edit the Master page's **Theme** and **Locale**, as well as access its **Share & Publish** options.
8. Go to the [Event types and assignment](#) section. This is where you create rules to determine how bookings will be assigned to Booking pages.
9. Customize the page's [Labels and instructions](#) and [Public content](#).

You're all set! To test your Master page, go to the [Master page Overview](#) and make a test booking by using the public link in the **Share & Publish** section.

**Tip:**

When you use a Master page using [team or panel pages](#), you can [generate one-time links](#) which are good for one booking only.

One-time links eliminate any chance of unwanted repeat bookings. A Customer who receives the link will only be able to use it for the intended booking and will not have access to your underlying [Booking page](#). One-time links [can be personalized](#), allowing the Customer to pick a time and schedule without having to fill out the [Booking form](#).
