What's new in version 9.2?

Last Modified on Jan 12, 2021

Version 9.2 is a minor release with one functional feature and maintenance and infrastructure upgrades. InviteOnce users can now copy meeting links to their clipboard and send them via email or instant messaging.

Copy links to clipboard for InviteOnce

With our 9.2 release, we've made scheduling during conversations even more accessible with the InviteOnce copy links to clipboard feature. This feature lets you invite a Customer or prospect to self schedule by copying and pasting InviteOnce links into your existing email thread or instant messaging conversation.
