

Introduction to Personalizing links with static parameters

Last Modified on Jul 16, 2020

After setting up your [Booking pages](#) or [Master pages](#), you'll need to share them with your prospects and Customers. In this section, you will learn how to Personalize links with static parameters.

Options for sharing your booking links in email and other apps

Booking pages can be shared using a **General link**, a **Personalized link (URL parameters)**, a **Personalized link (Salesforce ID)**, or a **Personalized link (Infusionsoft ID)**.

To access the links available to you, go the **Schedule button** in the top navigation bar and select **Share a booking link**. From there, you can select the relevant Booking page or Master page.

Using Personalized links

Each Booking page and Master page has its own unique Public link that can be shared with your prospects and Customers. The links that you share can be personalized to improve the experience for prospects and Customers.

You can personalize booking links in several ways:

- Using static variables
- Using specific Customers details
- Using dynamic variables
- Using dynamic URL parameters
- Using CRM record IDs
- Pre-populating information from a booking form

ScheduleOnce URL parameters and processing rules

You can share your [Booking page](#) or [Master page](#) using [Personalized links \(URL parameters\)](#), or publish them on your website using [Web form integration](#). If required, you can replace the ScheduleOnce placeholder parameters with your own parameters.

Creating a Personalized link for a specific Customer

You can create a static [Personalized link](#) using a Customer's personal details. The easiest way to do this is by selecting the **Schedule button** in your top navigation bar (Figure 1).

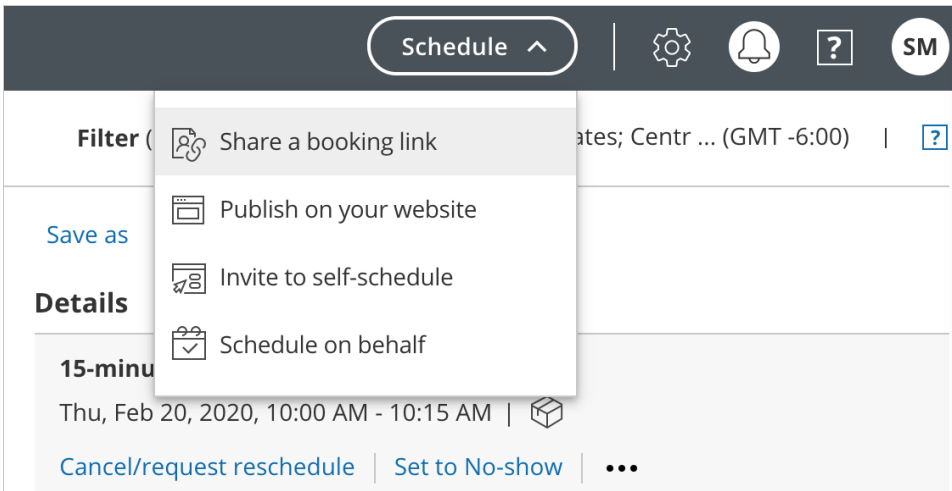

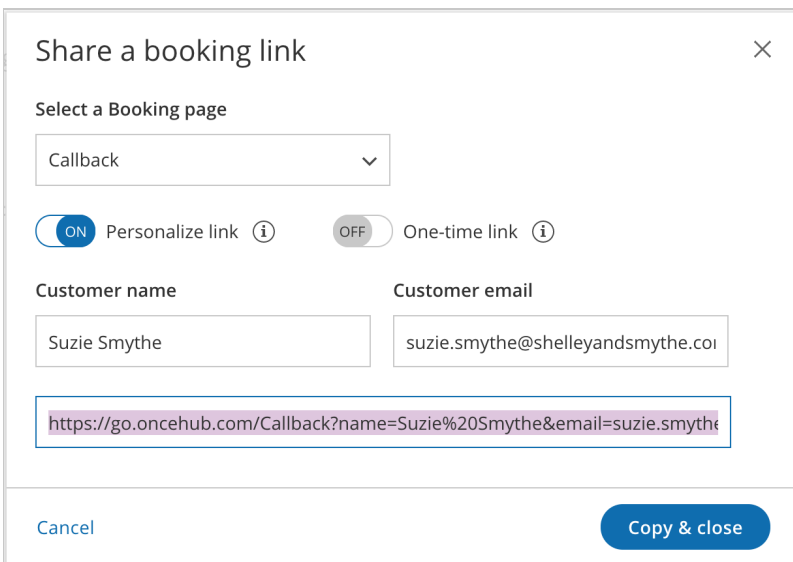

Figure 1: Schedule button

Toggle the **Personalize link** option to ON and enter the Customer's name and email address (Figure 2).

You can also navigate to the **Overview** section of the selected page, and click **Personalize for a specific Customer** (Figure 3).
