

# Connecting to Microsoft Teams

Last Modified on Oct 18, 2022

Our [Microsoft Teams](#) integration completely automates the provisioning of Microsoft Teams sessions. Customers receive a single OnceHub confirmation email including all of the meeting details in their local time zone.

All Users [connected to Office 365 Calendar using OAuth 2.0](#) can use Microsoft Teams video conferencing automatically, with no further integration required.

In this article, you'll learn how to connect to your Office 365 account so you can use Microsoft Teams.

In this article:

- [Connecting your Microsoft Teams account](#)

## Connecting your Microsoft Teams account

1. Select your profile picture or initials in the top right-hand corner → Profile settings → **Calendar connection**.
2. Connect to **Office 365 Calendar via OAuth** by clicking the **Connect** button (Figure 1).

Figure 1: Connect to Office 365 Calendar

3. The Office 365 Account sign-in page will open in a new pop-up tab.
4. If you are already signed in, your browser will detect this and ask you to confirm. If you are not signed in, you will need to sign into your Office 365 Account.

 **Note:**

Your credentials are known to Microsoft only, and are never stored in OnceHub. OnceHub communicates with Microsoft using an encrypted OAuth 2.0 connection.

5. Click **Allow** to authorize OnceHub to access your Office 365 Account.
6. You'll be redirected back to the OnceHub **Calendar connection** page, where you'll see confirmation of your Microsoft Teams connection and advanced integration settings.

Congratulations! OnceHub is now connected to your Microsoft Teams account. Next, you can [configure your Booking pages to use Microsoft Teams](#).

 **Note:**

If your Microsoft Teams account is not connected automatically, this could be because your Office 365 admin

has not signed up for Microsoft Teams or has deactivated Microsoft Teams for your specific Office 365 license.
