

The ScheduleOnce integration with Skype

Last Modified on Aug 23, 2020

The ScheduleOnce integration with Skype completely automates the provisioning of Skype sessions. Customers receive a single ScheduleOnce confirmation, including all meeting details in their local time zone.

This saves time, increases participation rates, and conveys a professional image to your Customers. [Learn more about the Skype video conferencing platform](#)

Benefits of the Skype integration

Schedule one-on-one meetings and group sessions

Each booking made creates a new Skype session. When multiple Customers sign up for the same session, such as a webinar, each booking receives the same Skype details.

Automatic connection with Office 365 Calendar integration

If your Microsoft 365 account does not include Microsoft Teams you'll be connected to Skype instead, as soon as you connect your Office 365 Calendar. [Learn more](#)

Automatically provision Skype sessions

When Skype is set as your default video conferencing option, a Skype session is automatically created whenever a new booking is made.

Automatically generate integrated notifications

Skype session details are an integral part of all ScheduleOnce notifications, enabling your customers to receive a single confirmation with all required information. This saves time and provides a professional image to your Customers.

Integrated canceling and rescheduling

When a booking is canceled or rescheduled by either the Customer or the Owner, the necessary updates are automatically made in Skype.
