

Configuring SSO with Okta

Last Modified on Oct 26, 2020

This article provides a step-by-step guide to configuring SSO between OnceHub and Okta.

Requirements

To configure SSO in your account, you must be a OnceHub Administrator. However, you do not need a product license. [Learn more](#)

You must already have an account with Okta. The person configuring in Okta must be an administrator.

Step-by-step directions

Request access

SSO is intended for accounts with multiple users who take the extra security measure of signing into third-party applications using an identity provider. Please [contact us](#) to learn more. OnceHub can enable the SSO functionality in your account manually.

SAML configuration

You can access SAML configuration at OnceHub **Account settings** -> In the lefthand sidebar, select **Security** -> **SSO**.

OnceHub provides specific field values you can copy and configure within Okta.

Make sure you're in the Classic UI. You can select this by going to **Developer Console** -> **Classic UI**.

1. Create a New Application Integration

In Okta, go to **Applications** -> **Create New App**.

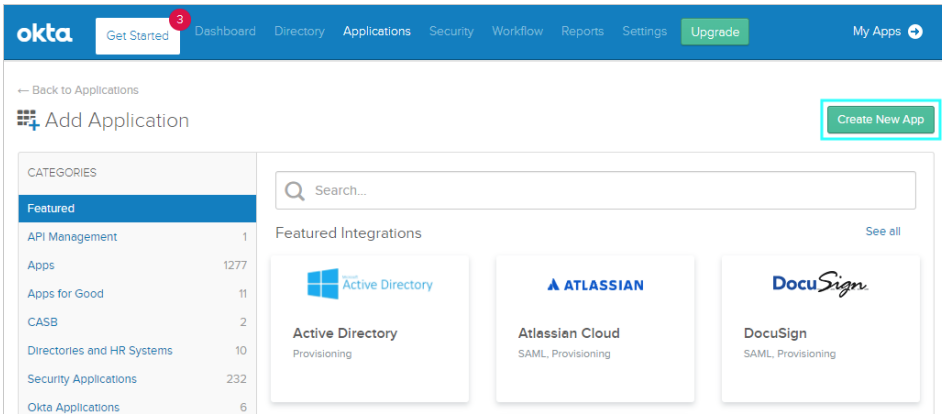

Figure 1: Create New App

In the popup, select **Web**. The sign on method should be **SAML 2.0**. Click **Create**.

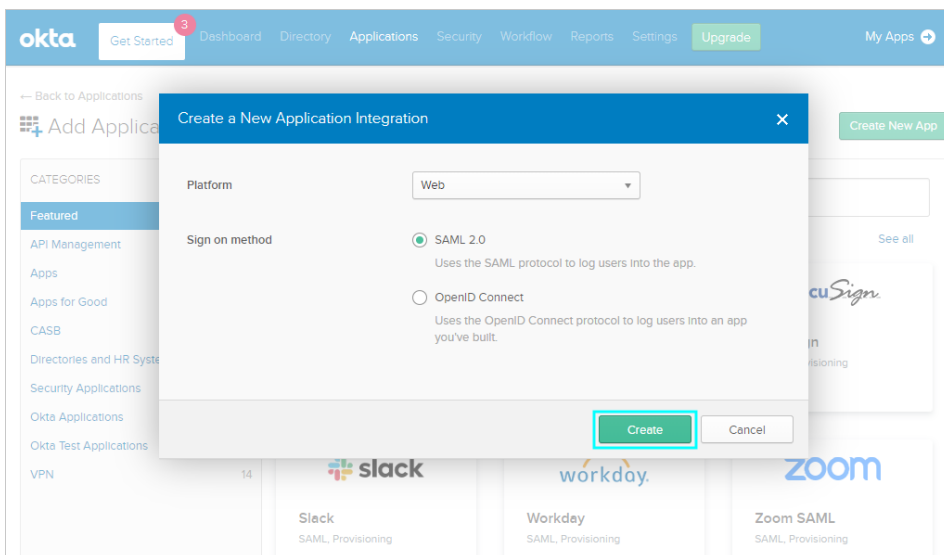

Figure 2: Create a New Application Integration

2. General Settings

On the **Create SAML Integration** page, give the app a name (for instance, OnceHub) and fill out the **General Settings**.

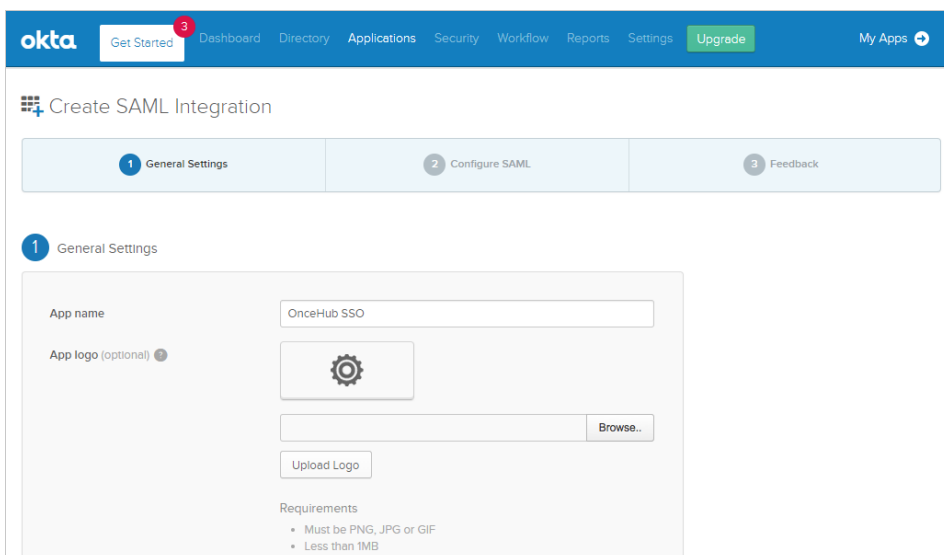

Figure 3: General Settings

3. SAML Settings from OnceHub

On the **Configure SAML** step, fill out the SAML Settings. You can grab these values in OnceHub, on the **Required by identity provider** step.

In Okta	In OnceHub
Audience URI (SP Entity ID)	Identifier URL
Single sign on URL + Select checkbox Use this for Recipient URL and Destination URL	ACS URL
[Not required; Okta refers to ACS URL for this function]	Single sign-on URL

These are the only required fields; the rest can be left blank.

4. Add an Attribute Statement

For the **Name** field, use **email** (in lower case). Map this to the **Value** field **user.email**.

You can keep the **Name format** on **Unspecified**.

SIGN ON METHODS

The sign-on method determines how a user signs into and manages their credentials for an application. Some sign-on methods require additional configuration in the 3rd party application.

Application username is determined by the user profile mapping. [Configure profile mapping](#)

In Okta	In OnceHub
Identity Provider Issuer	Entity ID
Identity Provider Single Sign-On URL	IDP single sign-on URL
X.509 Certificate	Public x509 certificate

Important:

For the Public x509 certificate, include the **-----BEGIN CERTIFICATE-----** and **-----END CERTIFICATE-----** syntax in your selection and paste it all into the OnceHub field.

6. Assignments

Before clicking Verify in OnceHub, go back to Okta and access **Assignments**. Click on the **Assign** dropdown and select **Assign to People**.

The screenshot shows the 'Assignments' tab for the 'OnceHub SSO' application. The 'Assign' button is highlighted with a red box, and its dropdown menu is open, showing 'Assign to People' and 'Assign to Groups'. The 'Assign to People' option is selected.

Figure 8: Assign to People

Assign your new OnceHub SAML 2.0 application to the relevant people in Okta.

7. Verify

In OnceHub, click **Verify** to confirm that SAML authentication is verified.

Figure 9: Verify configuration

8. Enable SSO for all users

Once you've verified your SSO configuration, you can select the **Enable SSO for all users** toggle. All Users in your OnceHub account can now [access their account using SSO](#).

Important:

Before you enable the account, make sure all your Users have matching email addresses for their OnceHub User profile and their Okta profile.

Once SSO is enabled, they **will not** be able to change their OnceHub email.

If their OnceHub email does not match the email in their IDP profile, they **will not** be able to log in.
