Adding forms to your Wix website

Last Modified on Oct 13, 2022

Adding a form to your Wix website is quick and easy.

Skip ahead to:

- Add a form to your website
  - Create the form
  - Install the code
    - In OnceHub
    - In Wix

Add a form to your website

Create the form

1. Go to **Forms** on the left.
2. Click on the **Create form** button OR duplicate another form by clicking the three dots menu for that form and selecting **Duplicate**.

Create the form as you prefer, either duplicated from another, from scratch, or using a template.

When you've added the interactions you want, routed them, and designed the form as you like, navigate to the **Publish** tab.

Install the code

In OnceHub

You'll grab the code you need for Wix.

1. On the **Publish** tab, select **Get the embed code**.
2. Copy the code.

Figure 1: Copy the embed code

In Wix

You'll embed a widget on your website, on each individual page where you want a form. This creates an iframe on the page, where your form will appear.

1. Edit your website.
2. Click + to add the widget.
3. Go to **Embed → Embed a widget**.
4. Make sure the size of the widget is the right size on your page to hold the embedded form in it, as you want it displayed. This must be a large enough size to display any form interactions included on your form, including the schedule action if you intend to use it.
5. Paste the code from OnceHub and adjust as needed.
6. Save your website.

That's it! Your website can now display your form in the place you added it.
