

Adding forms to your Leadpages landing page

Last Modified on Oct 13, 2022

Adding a form to your Leadpages landing page is quick and easy.

Skip ahead to:

- [Add a form to your landing page](#)
 - [Create the form](#)
 - [Install the code](#)
 - [In OnceHub](#)
 - [In Leadpages](#)

Add a form to your landing page

Create the form

1. Go to **Forms** on the left.
2. Click on the **Create form** button OR duplicate another form by clicking the three dots menu for that form and selecting **Duplicate**.

[Create the form](#) as you prefer, either duplicated from another, from scratch, or using a template.

When you've added the interactions you want, routed them, and designed the form as you like, navigate to the **Publish** tab.

Install the code

In OnceHub

You'll grab the code you need for Leadpages.

1. On the **Publish** tab, select **Get the embed code**.
2. Copy the code.

Figure 1: Copy the embed code

In Leadpages

You'll add an [HTML widget](#) on your landing page, in each place where you want a form. This creates an iframe on the page, where your form will appear.

1. Edit your landing page.
2. Click **Widgets** and drag the **HTML** widget onto your page. You may have to click **Show More** if HTML isn't listed. [Learn more about the HTML widget](#)
3. Paste the code from OnceHub and adjust as needed (for instance, the text for the link).
4. Save the widget.
5. Make sure the size of the widget is large enough on your page to hold the embedded form in it, as you want it displayed.
6. Publish/update your landing page.

That's it! Your landing page can now display your form in the place you added it.
