Booking pages: Recurring availability [Legacy]

Availability is always managed per Booking page. Availability settings on one Booking page are separate from the availability settings on another Booking page. OnceHub uses two types of availability: Recurring availability and [Date-specific availability](#).

You can use Recurring only, Date-specific only, or both. Recurring availability is defined on a weekly basis, allowing you to create a pattern that repeats every week.

You do not need an assigned product license to access and update the Recurring availability section, though you do need the right [Booking page access permissions](#). This means an assistant or other collaborator can update your availability on your behalf, without paying for an extra license. [Learn more](#)

In this article, you'll learn about using the Recurring availability section.

When to use Recurring availability

Recurring availability is best to use if your availability is consistent from week to week. This is especially true [if you have connected your calendar](#) and you [use busy times](#) to block out your availability.

If you have exceptions to your Recurring availability, you can use [Date-specific availability](#) to edit your availability without changing your weekly pattern. Date-specific availability overrides Recurring availability, and can be used to reduce or increase your availability.

Requirements

To edit the **Recurring availability** section, you must be an Owner or Editor of the Booking page with [the permission enabled in your Profile](#).

Editing the Recurring availability section

1. Go to **Booking pages** in the bar on the left.
2. Select the relevant Booking page.
3. Click on the **Recurring availability** section of the Booking page (Figure 1).

The default weekly recurring availability is set between 9 AM and 5 PM based on the Booking page time zone.

Note that only a weekly pattern without dates is displayed. Busy time from your connected calendar is not shown.
