

Booking pages first (Event types second) [Classic]

Master pages with Booking pages first (Event types second) allow Customers to first select which [Booking page](#) they prefer. They can then choose an [Event type](#) from the ones that are associated with that Booking page. Finally, the Customer schedules the meeting. The [preexisting associations between Booking pages and Event types](#) determine which Event types are offered on your Master page.

If you would like to [generate one-time links](#) which are good for one booking only, you should use a Master page using [Rule-based assignment](#) with [Dynamic rules](#).

One-time links eliminate any chance of unwanted repeat bookings. A Customer who receives the link will only be able to use it for the intended booking and will not have access to your underlying [Booking page](#). One-time links [can be personalized](#), allowing the Customer to pick a time and schedule without having to fill out the [Booking form](#). [Learn more about one-time links](#)

In this article, you'll learn about Master pages with Booking pages first.

In this article:

- [The Customer flow](#)
- [Requirements](#)
- [Setting up a Master page with Booking pages first](#)

The Customer flow

Figure 1: Customer flow for Booking pages first.

With Booking pages types first, the Customer first selects the Booking page they prefer and then chooses from the Event types offered by that Booking page.

After selecting an Event type, the Customer is presented with the availability of the Booking page they selected. They can choose a date and time and schedule the meeting.

 **Note:**

If there is only one Booking page included in the Master page, the Customer skips the Booking page selection step. They move directly to choosing an Event type.

If the selected [Booking page offers only one Event type](#), the Customer skips the Event type selection step and moves directly to choosing a time slot.

Requirements

To create a Master page with a Booking pages first scenario, you must be a [OnceHub Administrator](#).

Setting up a Master page with Booking pages first

1. [Create a Master page](#) by clicking the Plus button  in the **Master pages** pane.
2. In the **Scenario** field of the **New Master page** pop-up (Figure 2), select **Booking pages first (Event types second)**.
