

Booking pages only (without Event types) [Classic]

Master pages with Booking pages only (without Event types) allow Customers to only select which [Booking page](#) they prefer. Bookings are assigned according to the Customer's selection. This option is useful if you don't use [Event types](#) and there are no shared settings between your Booking pages.

If you would like to [generate one-time links](#) which are good for one booking only, you should use a Master page using [Rule-based assignment](#) with [Dynamic rules](#).

One-time links eliminate any chance of unwanted repeat bookings. A Customer who receives the link will only be able to use it for the intended booking and will not have access to your underlying [Booking page](#). One-time links [can be personalized](#), allowing the Customer to pick a time and schedule without having to fill out the [Booking form](#). Learn more about [one-time links](#)

In this article, you'll learn about Master pages with Booking pages only.

In this article:

- [The Customer flow](#)
- [Requirements](#)
- [Setting up a Master page with Booking pages only](#)

The Customer flow

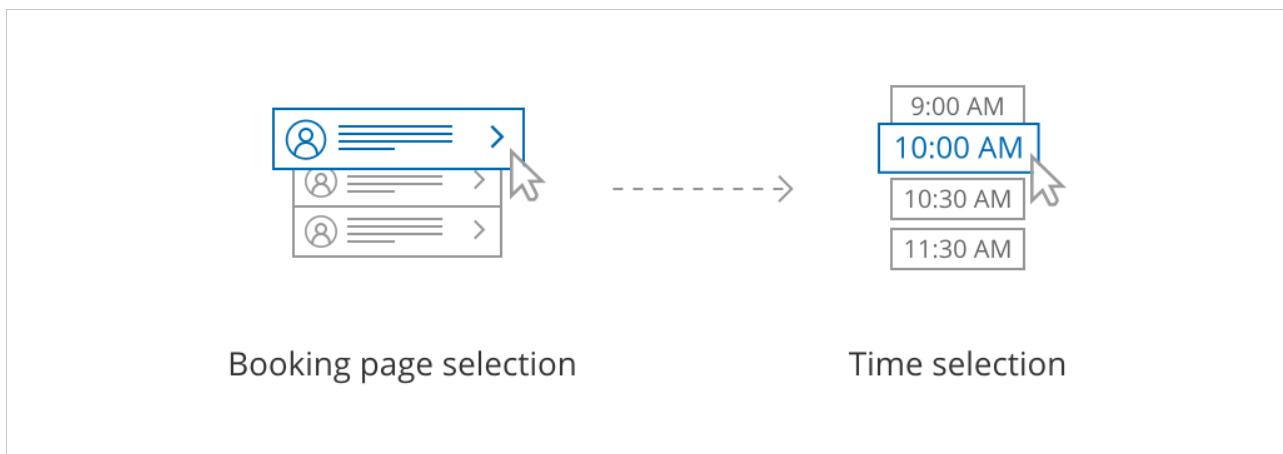

Figure 1: Customer flow for Booking pages only

With Booking pages only, the Customer selects a Booking page and is presented with the Booking page's availability. The Customer then selects a date and time and schedules the meeting.

Requirements

To create a Master page with a Booking pages only scenario, you must be a [OnceHub Administrator](#).

Setting up a Master page with Booking pages only

1. [Create a Master page](#) by clicking the Plus button  in the **Master pages** pane.
2. In the **Scenario** field of the **New Master page** pop-up (Figure 2), select **Booking pages only (without Event types)**.
