

Resource pool statistics: Bookings removed [Legacy]

Resource pools allow you to dynamically distribute bookings among a group of Team members in the same department, location, or with any other shared characteristic.

Bookings removed is a metric provided for each **Booking page** you've included in a **Resource pool**. **Bookings removed** is the number of bookings that were taken away from a specific Booking page to date, within the existing **Reporting cycle**.

In this article, you'll learn about viewing and understanding the Bookings removed metric.

Requirements

To view the **Bookings removed** metric, you must be a **OnceHub Administrator**.

Viewing the Bookings removed metric

1. Go to **Booking pages** in the bar on the left.
2. Select **Resource pools** on the left (Figure 1).

Understanding the Bookings removed metric

If the specific [Resource pool is included in multiple Master pages](#), the **Bookings removed** metric shown for each Booking page is the total number of bookings taken away from that Booking page across all Master pages.

Bookings can be removed from a Booking page due to cancellations, rescheduling, reassignments, or no-shows.

- **Bookings removed due to cancellations:** This happens when a Customer cancels a booking that was originally scheduled on the Master page that included the specific Resource pool, or when a User cancels a booking or requests the booking to be rescheduled.
 - **Bookings removed due to rescheduling:** This happens when a Customer reschedules a booking and the booking is assigned to a different Booking page from the original Booking page that was assigned. In this case, the **Bookings removed** counter will go up by one for the original Booking page that the Customer scheduled with. The [Bookings received](#) counter will go up by one for the new Booking page that the Customer rescheduled with.
 - **Bookings removed due to reassignment:** This happens when a User reassigns a booking from one Booking page to another. In this case, the **Bookings removed** counter will go up by one for the original Booking page that the booking was reassigned from. The **Bookings received** counter will go up by one for the new Booking page that the User reassigned the booking to.
 - **Bookings removed due to no-shows:** This happens when a User marks a booking as a no-show. The booking marked as no-show needs to have been originally scheduled on the Master page that included the specific Resource pool.
