Welcome! If your account was created after January 20, 2025, you are using our new **Booking Calendars**.
 Not sure? [Identify your product](#)

System themes [Legacy]

The OnceHub [Theme designer](#) provides two system themes for your [Booking pages](#) and [Master pages](#). You can use these themes as they are, or adjust them according to your needs.

In this article, you'll learn about System themes.

In this article:

- [Editing a system theme](#)
- [Theme properties of a System theme](#)
- [Previewing and applying a System theme](#)
 - [Default theme](#)
- [Available System themes](#)

Editing a system theme

1. Go to **Setup** -> **OnceHub setup** and open the lefthand sidebar.
2. In the **Tools** section, select **Theme designer**.
3. Select a System theme from the list on the left hand side of the page (Figure 1).

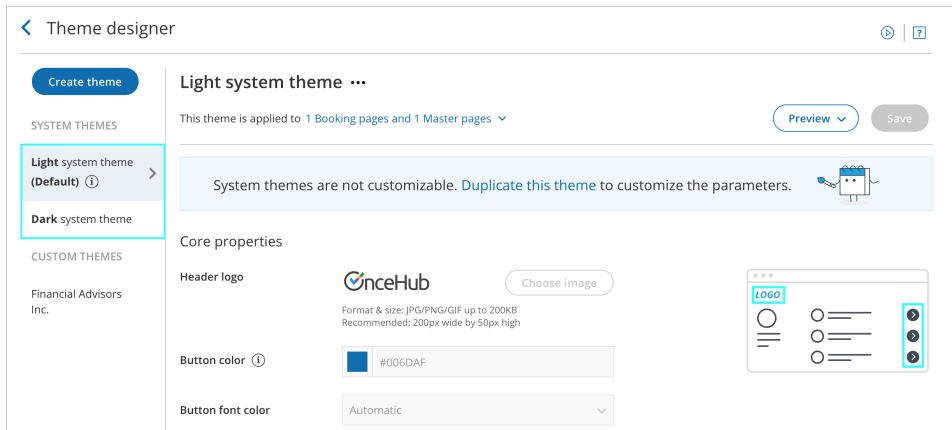

Figure 1: Select a System theme

4. If required, you can add a **header logo**, edit the **button color**, and edit the **button font color**.
5. When you're done making changes, click **Save**.

Theme properties of a System theme

You can customize the following [Theme properties](#) of a System theme:

- **Header logo:** This image is visible to your Customers.
- **Button color:** This is the color of the buttons and other properties on your page. It is intended to attract your Customer's attention to specific elements.
- **Button font color:** This can be used to maximize contrast against the button background color. We recommend keeping it on

Automatic.

Note:

If you want to customize additional Theme properties, you'll need to [create a Custom theme](#).
 You may need to upgrade your plan to apply a custom theme to your page(s).

Previewing and applying a System theme

To preview a theme on a Booking page or Master page, select it from the drop-down menu in the top right of the Theme designer and click the **Preview** button (Figure 2). Previewing a theme does not apply the theme to the page.

Default theme

You can set any theme as your default theme, including a system theme. The default theme is automatically applied to all newly created pages, but not to existing pages.
