

Payment integration issues [Legacy]

There are a number of reasons why you might not be able to accept payments or process refunds via OnceHub. This article describes potential issues with [payment integration](#) and how these issues can be fixed.

In this article:

- [You cannot accept payments](#)
 - [Your account is disconnected from PayPal](#)
 - [Your PayPal account is frozen](#)
 - [You removed the currency set in the Event type from your PayPal account](#)

 - [Your OnceHub account cannot process refunds via OnceHub](#)
 - [The Booking page Owner or Editor does not have permission to refund via OnceHub](#)
 - [Transactions older than 60 days cannot be refunded](#)
 - [There are not enough funds in the PayPal account](#)

You cannot accept payments

If you cannot accept payments via OnceHub, you should check errors related to the connected PayPal account. Errors might occur for the following reasons.

Your account is disconnected from PayPal

If your account is disconnected from PayPal, your Billing Agreement might have been revoked or the permissions granted to OnceHub were canceled in your PayPal account.

To fix this, check the connected PayPal account and reconnect in OnceHub.

Your PayPal account is frozen

Your PayPal account might be limited or frozen for security reasons in PayPal. You can log in to your PayPal account to understand why your account is limited. Account limitations prevent OnceHub from completing certain actions such as sending or receiving money.

You removed the currency set in the Event type from your PayPal account

If you have removed the currency set in the Event type from your PayPal account, it will affect the collection of reschedule fees when a reschedule is attempted by the Customer. Since the Reschedule fee currency does not exist in PayPal, the reschedule will not be possible.

Issues are encountered with the PayPal connection

OnceHub might not be able to confirm the transaction due to errors with the PayPal connection. In this case, the Customer will not be able to make a booking.

Refunds cannot be processed

If refunds cannot be processed, you should check errors related to your [Refund settings](#), the [Booking page Owner/Editor](#), or the specific transaction. This might happen for the following reasons:

Your OnceHub account cannot process refunds via OnceHub

If your OnceHub account cannot process refunds via OnceHub, you should change the Refund settings to allow processing of refunds via OnceHub.

[Learn more about customizing Refund settings](#)

The Booking page Owner or Editor does not have permission to refund via OnceHub

Check each User's profile to ensure that the Booking page Owner or Editor has permission to refund via OnceHub.

[Learn more about the OnceHub permissions section](#)

Transactions older than 60 days cannot be refunded

Refunds are limited to 60 days by default in your PayPal account and refunds cannot be made after the limit. If you still want to refund old transactions, you should contact PayPal to extend the transaction refund limit.

There are not enough funds in the PayPal account

If there are not enough funds in your PayPal account, you won't be able to process refunds for that specific transaction. Check your PayPal account.

 **Note:**

If you have explored all these options and you are still experiencing issues, please [contact us](#).
