

Connect OnceHub to Your iCloud Calendar

Connecting OnceHub to your iCloud Calendar ensures a real-time integration between your calendar and OnceHub.

How to Connect to Your iCloud Calendar

Follow these steps to connect your iCloud Calendar account:

Navigating to User Integrations

1. Click on your profile picture in the top right-hand corner.
2. Select **User Integrations**.

Connecting to Your iCloud Calendar

1. Click on the **iCloud Calendar** tile.
2. Click on **Connect**.
3. Enter your Apple ID and an App-specific password in the pop-up.
4. Click on **Connect**.

Note: An iCloud app-specific password is a unique password generated for third-party applications like OnceHub, which require access to your Apple ID.

To learn how to generate this password, refer to Apple's [Sign into apps with your Apple Account using app-specific passwords](#) article.

When connecting to your iCloud Calendar account, you might see an alert about the browser's pop-up blocker blocking the connection window.

There are two possible ways in which this can be fixed:

1. Create an exception for <https://app.oncehub.com/>. This will whitelist OnceHub with your browser and pop-ups from OnceHub will not be blocked.
2. You can disable the pop-up blocker entirely.

The following links provide step-by-step instructions for each browser type:
