

## Salesforce scheduling buttons for Contacts, Leads and Cases [Classic]

[Salesforce scheduling buttons](#) provide a quick method to schedule on behalf of a Customer. Bookings made via these buttons are automatically added to the Salesforce record that the booking is scheduled from.

Salesforce scheduling buttons can be configured to [prepopulate the booking form, or skip it altogether](#). This is enabled by the [optional mapping step in the Salesforce setup wizard](#), where you can define the mapping between Salesforce record fields and OnceHub Booking form fields.
