

Accessing your account with single sign-on (SSO)

Signing in with single sign-on (SSO) is a feature designed specifically for organizations using an identity provider across their organization to regulate signing into all their third-party apps through SSO. This may include identity providers such as:

- [Okta](#)
- [OneLogin](#)
- [Azure](#)
- [G Suite](#)

To use SSO to sign into OnceHub, your OnceHub Administrator must have already [configured SSO](#) for your account.

To access your OnceHub account, click the **Sign in with SSO** link at the bottom of the OnceHub sign-in page.

The image shows a screenshot of the OnceHub sign-in page. At the top, there is an illustration of two cartoon characters standing on a red carpet. Below this, the text reads "Welcome back" in a large, bold font. Underneath, it says "Don't have an account? [Start a free trial](#)". There are two input fields: "Email" and "Password". To the right of the "Password" field is a link that says "Forgot your password?". Below the input fields is a large blue button labeled "Sign in". Underneath the "Sign in" button is the word "Or" flanked by horizontal lines. Below "Or" are two buttons: "Sign in with SSO" (a blue button with a white border) and "Sign in with G Suite" (a white button with a blue border and the Google logo icon).

Figure 1: Sign in with SSO

You will provide your email and be redirected to your identity provider. Once authenticated, you'll be returned to your signed-in OnceHub account.

If you're having difficulty signing in, please don't hesitate to [contact us](#) for more help.
