

Share and Embed Your Booking Calendar [New]

Your **Booking Calendar** is a powerful tool for streamlining appointments, and there are two easy ways to share it with your customers:

- Embed it directly on your website for a cohesive, integrated experience.
 - Share a standalone, fully branded **Booking Page** using the **Page Designer** to distribute via email, social media, or other channels.
-

Sharing as a Page

Create a customized, standalone **Page** perfect for sharing outside your website. Whether promoting events, sending calendar links via email, or including them in campaigns, the Page Designer offers flexible branding options and real-time previews to ensure your page reflects your style. You can also group multiple calendars into a unified **Booking Hub** for easier navigation.

- To learn more about designing your Page, please take a look at our article on [How To Design a Page for Your Booking Calendar](#).
 - To learn about pre-filling your **Page** with guest information, please take a look at [this article](#).
-

Embed Your Calendar on Your Website

Embedding your **Booking Calendar** allows visitors to schedule appointments without ever leaving your site. This option is ideal for businesses that want to provide a fully integrated experience, letting customers seamlessly book while exploring your services.

For step-by-step instructions on how to embed your **Booking Calendar**, please [click here](#).

Whether you choose to embed your calendar or share a standalone booking page, both options help you offer a smooth and professional scheduling experience for your customers. Explore deeper customization and setup options by following the linked guides.
