

How To Integrate OnceHub With Microsoft Entra ID

Automatically add and delete users in OnceHub directly from Entra ID using SCIM. This provides real-time synchronization ensuring that user access is always up to date, reducing administrative overhead and enhancing security.

This article guides you through the process of establishing a SCIM integration between OnceHub and Entra ID.

Step 1: Create a New OnceHub Application in Entra ID

In Entra ID, follow the steps below to create a new SCIM application integration:

1. Select **Enterprise apps** from the left navigation menu.
2. Click **New application** in the top left of the screen.
3. Click **Create your own application** in the top left of the screen.
4. Provide a name for the app.
5. Select **Integrate any other application you don't find in the gallery (Non-gallery)**.
6. Click **Create**.

Step 2: Configure the OnceHub Application Settings in Entra ID

Next, you will need to add your OnceHub details to the application you created in Entra ID.

Finding the Integration Details within OnceHub

In OnceHub, follow these steps to open the **Entra ID** integration view with the required details:

1. Click the gear icon in the top right corner.
2. Select **Account Integrations** from the dropdown
3. Filter for **Security and Compliance**.
4. Click the **Microsoft Entra ID** tile.

NOTE: Keep the view open for the steps below.

Add the Integration Details within Entra ID

In Entra ID, follow the steps below to complete the configuration:

1. Click **Provisioning** from the left navigation menu of the created app.
2. Click **Connect your application**.

3. Copy over the following details from OnceHub:

In Entra ID	In OnceHub
Tenant URL	Base URL
Secret Token	Secret Key (Click Generate secret key)

4. Click Test connection.
5. Click Create to finish configuring the application.

With your integration complete, you can begin using Entra ID to automate your OnceHub user management.
